

Offsight Solutions Consulting: Prefab Package

Our customizable, fixed price package guides your team in applying tech-enabled offsite construction to drive manufacturing efficiency.

Tap Into The Largest Prefab Specific Technology Resource

- ✓ Billions of offsite construction volume pass through our platform each year
- ✓ Gain access into the latest tech-enabled prefab and process innovations driving ROI
- ✓ Access best-in-class industry benchmarks for production and project KPIs
- ✓ Learn how to build pipeline and gain owner trust through transparency & data

Transitioning To A Manufacturing First Mindset:

Tracking Manufacturing KPIs & Managing Production

Visualize your workflow, identify KPIs, and leverage technology to drive ROI.

Project Collaboration and Coordination From the Shop Floor

Gain client trust with project transparency, address factory mandated code review and improve your quality program with real time technology.

Applying Manufacturing Principles for Project Planning

Understand resource constraints in your factory, leverage intelligent technology workflows to automatically generate detailed production plans and track against actual progress.

Implementing Best-In-Class Material and Labor Management Practices

Unlock ROI well beyond what's possible with traditional construction by implementing just-in-time material control and shop floor labor tracking.
